# **Energy performance certificate (EPC)**

| 64, Golden Cross Lane<br>Catshill<br>BROMSGROVE<br>B61 0LG | Energy rating                   | Valid until:           | 8 April 2027             |
|--|---------------------------------|------------------------|--------------------------|
|  | - <b>-</b>                      | Certificate<br>number: | 0551-2818-7046-9103-5465 |
| Property type  | operty type Semi-detached house |                        |                          |
| Total floor area   | 91 square metres                |                        |                          |

## Rules on letting this property

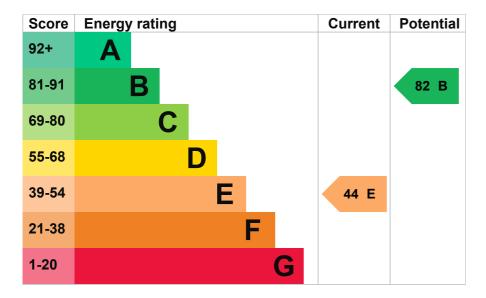

Properties can be let if they have an energy rating from A to E.

You can read guidance for landlords on the regulations and exemptions (https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standardlandlord-guidance).

# **Energy rating and score**

This property's energy rating is E. It has the potential to be B.

See how to improve this property's energy efficiency.

The graph shows this property's current and potential energy rating.

Properties get a rating from A (best) to G (worst) and a score. The better the rating and score, the lower your energy bills are likely to be.

For properties in England and Wales:

- the average energy rating is D
- the average energy score is 60

# Breakdown of property's energy performance

### Features in this property

Features get a rating from very good to very poor, based on how energy efficient they are. Ratings are not based on how well features work or their condition.

Assumed ratings are based on the property's age and type. They are used for features the assessor could not inspect.

| Feature              | Description   | Rating    |
|----------------------|---|-----------|
| Wall                 | Solid brick, as built, no insulation (assumed)      | Very poor |
| Wall                 | Cavity wall, as built, partial insulation (assumed) | Average   |
| Roof                 | Pitched, no insulation (assumed)                    | Very poor |
| Roof                 | Flat, limited insulation (assumed)                  | Poor      |
| Window               | Partial double glazing                              | Poor      |
| Main heating         | Boiler and radiators, mains gas                     | Good      |
| Main heating control | Programmer, TRVs and bypass                         | Average   |
| Hot water            | Electric immersion, standard tariff                 | Very poor |
| Lighting             | Low energy lighting in 57% of fixed outlets         | Good      |
| Floor                | Solid, no insulation (assumed)                      | N/A       |
| Secondary heating    | Room heaters, mains gas                             | N/A       |

#### Primary energy use

The primary energy use for this property per year is 404 kilowatt hours per square metre (kWh/m2).

About primary energy use

#### **Additional information**

Additional information about this property:

· Cavity fill is recommended

# How this affects your energy bills

An average household would need to spend £1,496 per year on heating, hot water and lighting in this property. These costs usually make up the majority of your energy bills.

You could save £792 per year if you complete the suggested steps for improving this property's energy rating.

This is **based on average costs in 2017** when this EPC was created. People living at the property may use different amounts of energy for heating, hot water and lighting.

#### Heating this property

Estimated energy needed in this property is:

- 14,642 kWh per year for heating
- 2,197 kWh per year for hot water

### Impact on the environment

This property's environmental impact rating is E. It has the potential to be C.

Properties get a rating from A (best) to G (worst) on how much carbon dioxide (CO2) they produce each year.

#### **Carbon emissions**

You could improve this property's CO2 emissions by making the suggested changes. This will help to protect the environment.

These ratings are based on assumptions about average occupancy and energy use. People living at the property may use different amounts of energy.

# Steps you could take to save energy

Do I need to follow these steps in order?

#### Step 1: Flat roof or sloping ceiling insulation

| Typical installation cost                | £850 - £1,500 |
|--|---------------|
| Typical yearly saving                    | £36           |
| Potential rating after completing step 1 | 45 E          |

### Step 2: Cavity wall insulation

| Typical installation cost                       | £500 - £1,500 |
|---|---------------|
| Typical yearly saving                           | £95           |
| Potential rating after completing steps 1 and 2 | 49 E          |

#### Step 3: Internal or external wall insulation

| Typical installation cost                      | £4,000 - £14,000 |
|--|------------------|
| Typical yearly saving                          | £97              |
| Potential rating after completing steps 1 to 3 | 52 E             |

#### Step 4: Floor insulation (solid floor)

| Typical installation cost                      | £4,000 - £6,000 |
|--|-----------------|
| Typical yearly saving                          | £53             |
| Potential rating after completing steps 1 to 4 | 54 E            |

#### Step 5: Hot water cylinder insulation

Add additional 80 mm jacket to hot water cylinder

| Typical installation cost                      | £15 - £30 |
|--|-----------|
| Typical yearly saving                          | £29       |
| Potential rating after completing steps 1 to 5 | 55 D      |

### Step 6: Low energy lighting

| Typical | installation of | ost |
|---------|-----------------|-----|
|---------|-----------------|-----|

| Typical yearly saving  | £21                |
|--|--------------------|
| Potential rating after completing steps 1 to 6                       | 56 D               |
|  |                    |
| Step 7: Heating controls (room thermostat)                           |                    |
| Step 7: Heating controls (room thermostat) Typical installation cost | £350 - £450        |
|  | £350 - £450<br>£50 |

### Step 8: Replace boiler with new condensing boiler

| Typical installation cost                      | £2,200 - £3,000 |
|--|-----------------|
| Typical yearly saving                          | £328            |
| Potential rating after completing steps 1 to 8 | 70 C            |

### Step 9: Solar water heating

| Typical installation cost                      | £4,000 - £6,000 |
|--|-----------------|
| Typical yearly saving                          | £43             |
| Potential rating after completing steps 1 to 9 | 71 C            |

#### Step 10: Double glazed windows

Replace single glazed windows with low-E double glazed windows

| Typical installation cost                       | £3,300 - £6,500 |
|---|-----------------|
| Typical yearly saving                           | £41             |
| Potential rating after completing steps 1 to 10 | 73 C            |

### Step 11: Solar photovoltaic panels, 2.5 kWp

| Typical installation cost                       | £5,000 - £8,000 |
|---|-----------------|
| Typical yearly saving                           | £271            |
| Potential rating after completing steps 1 to 11 | 82 B            |

#### Advice on making energy saving improvements

#### Help paying for energy saving improvements

You may be eligible for help with the cost of improvements:

- Insulation: Great British Insulation Scheme
- Heat pumps and biomass boilers: Boiler Upgrade Scheme
- Help from your energy supplier: Energy Company Obligation

# Who to contact about this certificate

#### Contacting the assessor

If you're unhappy about your property's energy assessment or certificate, you can complain to the assessor who created it.

| Assessor's name | David Jones        |
|-----------------|--------------------|
| Telephone       | 07941 475779       |
| Email           | youcompli@mail.com |

#### Contacting the accreditation scheme

If you're still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.

| Accreditation scheme | NHER                           |
|----------------------|--------------------------------|
| Assessor's ID        | NHER009422                     |
| Telephone            | 01455 883 250                  |
| Email                | enquiries@elmhurstenergy.co.uk |

#### About this assessment

| Assessor's declaration | No related party |
|------------------------|------------------|
| Date of assessment     | 8 April 2017     |
| Date of certificate    | 9 April 2017     |
| Type of assessment     | ► <u>RdSAP</u>   |

# Other certificates for this property
